Acidic softener for the thermal reprocessing of bedpans and urine bottles

# thermosept<sup>®</sup> SKS

### **Our Plus**

- prevents limescale
- foam-free, free of surfactants
- eco-friendly
- high material compatibility with stainless steel and differnet types of plastics

### **Application areas**

thermosept<sup>®</sup> SKS is suitable for the thermal repossessing of bedpans and urine bottles in any commercially available equipment. Product is applicable for all levels of water hardness.

#### Instructions for use

#### Dosage:

0.01 % per 1° dH (corresponds to 0.18 mmol/l water hardness), generally that corresponds to a dose of 0.1 - 0.3 % (1 - 3 ml/l water).

Dosing is performed by machine-integrated dosing pumps. Please check dosing pumps for acid resistence prior to application. If there is a large amount of limescale on the heating element descaling is recommended before using thermsept<sup>®</sup> SKS. thermosept<sup>®</sup> SKS prevents limescale in the steam generator, also with hard water. To avoid limescale in general, not only should regular maintenance be carried out but the canister should be replaced at regular intervals. For professional use only!
