### schülke -}

Low-alcohol, rapid disinfection of non-invasive medical devices and surfaces.

# mikrozid<sup>®</sup> universal wipes premium

#### **Our Plus**

- Suitable for disinfecting sensitive communication devices
- Dermatologically tested
- Ready to use

#### **Application areas**

The product is suitable for disinfecting medical devices and other surfaces. Our versatile, rapid disinfectant is also suitable for disinfecting sensitive communication devices. Smartphones and tablets are among the most common hand contact surfaces. With mikrozid® universal, these can be safely prepared without damaging the materials.

## mikrozid<sup>®</sup> universal wipes

#### **Product data**

#### Composition:

100 g solution contains the following active substances: 17,4 g Propan-2-ol, 12,6 g Ethanol (94 % w/w) Labelling according to Regulation (EC) No. 648/2004: < 5% anionic surfactants

#### Chemical-physical data

Color colourless

Density ca. 0,95 g/cm $^3$  / of the active solution Flash point 26 °C / Method : DIN 51755 Part 1 / of the

active solution

Form Aqueous, alcohol containing solution on non-

woven

pH 3 - 3,6 / of the active solution

Viscosity, dynamic No data available

#### **Special advice**

Use disinfectants safely. Always read the label and product information before use.

The product has good material compatibility with metals and plastics. Do not use on alcohol-sensitive lacquers. When using alcoholic disinfectants, please observe the fire and explosion protection in accordance with the trade association regulation "Disinfection Work in Health Care". Keep away from heat and sources of ignition. Further information is available on request. If handled properly, schülke guarantees a shelf life of one month once the package has been opened.

Following sizes are available:

- mikrozid® universal wipes premium (6 x 100 wipes 20 x 20 cm)
- mikrozid® universal wipes premium maxi (6 x 80 wipes 25 x 25 cm)

#### Instruction for use

Thoroughly wipe the surface with the cloth and allow the active ingredient solution to take effect. Ensure complete wetting of the surfaces. Ensure that all visible soiling has been removed prior to disinfection. Only treat small areas. The wiping range depends on the room temperature and the structure of the surfaces to be disinfected. Observe hygiene aspects when opening the softpack. Ensure that the lid is closed after use. In the case of adenovirus and Mycobacterium tuberculosis, the surface should be kept wet during the entire contact time. For professional use only. Any serious incidents related to the product are to be reported to the manufacturer and competent authority. Not for final disinfection of semicritical and critical medical devices! The product can also be used without gloves, if allowed by infection protection and occupational safety standards.
